

The FDA Safety Information and Adverse Event Reporting Program

Jack Distribution, LLC issued a voluntary nationwide recall of selected lots of Rize 2 The Occasion Capsules and Rose 4 Her Capsules, marketed as dietary supplements. The products were recalled because certain lots contained thiomethisosildenafil, an undeclared ingredient that is an analog of sildenafil, a FDA-approved drug used for Erectile Dysfunction. This undeclared chemical poses a potential threat to consumers because it may interact with nitrates found in some prescription drugs (such as nitroglycerin) and may lower blood pressure to dangerous levels. Consumers who have one of the above products should stop using them immediately and contact their physician if they have experienced any problems that may be related to taking the products. See the manufacturer's press release for the specific lot numbers of the recalled products.
